

SIROCCO SHEERS

Covering the windows of Australia

An advanced concept in window coverings.

SIROCCO SHEERS is an innovative product offering the privacy of a window blind with the elegant softness of a sheer fabric. A privacy fabric strip is woven in between two layers of sheer fabric to combine the light control of a Venetian blind with the simple operation of a roller blind.

SIROCCO SHEERS are made from a durable blend of polyester and nylon. Whilst achieving a soft luxurious looking window dressing, SIROCCO SHEERS remain tough and durable.

Easy continuous cord operation gradually tilts the fabric vane until it is closed for total privacy. Alternatively, the blind can be rolled up and away into its own colour co-ordinated cassette.

SIROCCO SHEERS allow you to reduce the glare of the bright sunlight during the day and still enjoy the view, while providing day time privacy.

Explore our selection of decorator colours ranging from pastels to vibrant colours that make a statement, all with colour co-ordinated accessories.

A tensioning device is installed with all chain controls to ensure your child's safety.
