

Verandah Straight Drop Awning

Verandah Straight Drop Awnings provide sun protection and privacy where there is minimal space for the operation of other types of Roll Up Fabric Awnings. Cord operation through a system of pulleys raises and lowers the awning. The rope can be tied off to a cleat or external awning winch. Sunlight Products sources an extensive range of Fabrics from all of the major suppliers to the awning industry. An awning hood is available in a delightful range of colours, complementing the overall appearance of the awning as well as helping to protect the fabric when the awning is not in use.

Available Sizes

Width:

Maximum Width – 6000mm

Drop:

Maximum Drop – 3000mm

Material:

galvanised Steel

End Caps Material:

Cast Aluminium with Strap D

Cords

Dimensions:

6mm

Material:

Polypropylene

Colour:

White, Black

Rope Operation/Winch

Awning rolls from the bottom and is raised and lowered using 6mm rope passing through a series of metal pulleys. Rope can be tied off to a metal cleat or a Boat Winch is an optional extra to be used externally.

Tie Down Straps

300mm, 450mm, 600mm, 900mm, 1000mm PVC straps attach the bottom rail end cap to a breaching staple mounted onto the floor, railing, or side posts - depending on the application.

Reinforced strap cut-outs in the fabric along the bottom rail is an option instead of straps at the ends of the bottom rail.

Available Fabrics

Addalong Canvas, Brella Canvas, Hunter Douglas Canvas, Dickson, Planasol, Solaire, Docril, Sun Brella, Outlook, Vistaweave, Shadeview, Visiontex, Clear/Tinted PVC
